

RQ-029 - 10,000 PSI Test Panel

Key Features:

- Visual subsea display gauges showing injection pressures, and both ends of the test.
- Simple to integrate.

WHATS INCLUDED

10,000 PSI Test Panel.
Operational hoses.
Operations Manual.
Certificate Pack.

OPTIONS

Spares Kit.
10k IHPU.
Fluid Reservoirs.

Description

The 10k psi Test Panel is designed to be used in conjunction with the 10k psi IHPU (P/N: RQ-012) and provides a means of pressure testing equipment.

The unit allows pressurised delivery fluid from the 10k psi IHPU to be locked within the equipment being tested and displays the internal pressure on a gauge.

The unit consists of a dual input and output setup allowing it to supply pressurised delivery fluid from Outputs A and/or B of the 10k psi IHPU as required.

RQ-029 - 10,000 PSI Test Panel

Overall Specifications	
Weight in Air	6.4 Kg
Weight in Water	5 Kg
Dimensions	L400 x W220 x H200mm
Suitable Media	Sea Water, Glycol, Hydraulic Oil
Input / Outputs	
Max Delivery Fluid Pressure	690 Bar (10,000 PSI)
Max Piston Pressure	200 Bar (2,890 PSI)
Hydraulic Connections	
Inlets A & B	4 JIC
Outlets A & B	4 JIC
Piston Connections	4 JIC
