

RQ-045 – 22kw Deck HPU

WHATS INCLUDED

22KW HPU.
Operational hoses.
Operations Manual.
Certificate Pack.

OPTIONS

Spares Kit.
Hose Basket.
Weather Cover.

Key Features:

- Can be used for a variety of tasks.
- Built In overspill tray.
- Built in Filters.
- Hydraulic soft start.
- Built in CJC.
- Forklift Pockets.

Description

The 22kW HPU is a complete power generation system designed to convert electrical input into a usable hydraulic power source for supply to a hydraulic ROV system and associated equipment.

The system can of course also be used for various other offshore and onshore applications.

The system comes complete with a CJC unit for filtration and water separation. This is capable of cleaning hydraulic oils to 3 microns absolute to assist in providing a clean oil source and reducing risk of water ingress to the ROV system.

The system comes in a DNV rated lifting frame, fork lift pockets and with a 200L tank capacity. It runs on 440VAC and has a selectable output range.

RQ-045 – 22kw Deck HPU

Overall Specifications	
Weight in Air	1000 Kg
Dimensions	L1350 x W1000 x H1260mm
Suitable Media	Hydraulic Oil
Outputs	
Output Pressure	250 Bar (3600 PSI)
Output Flow	55 LPM
